(54) Title of Invention
CELLULAR PHONE HAVING CAMERA FACE ARRANGER

Representative drawing

(57) Abstract:

PURPOSE: A cellular phone having a camera face arranger is provided to form a face arranging reference point on the cellular phone. Therefore, it is possible to confirm that a camera location and a face location are arranged.

CONSTITUTION: A cellular phone having a camera face arranger is composed of a face arranging reference point(3). The face arranging reference point(3) is formed between an LCD(Liquid Crystal Display)(5) and a camera(4), and arranges a camera location and a face location. The LCD(5) is equipped on an upper plate(2) of a cellular phone body(1). The face arranging reference point(3) is installed on an upper center of the LCD (5), and has a hole penetrating the cellular phone body(1). A diameter of the hole becomes narrower in a rear direction. A mirror or an object having a regular reflection characteristic is attached to an upper end of the LCD(5). The face arranging reference point(3) arranges the face location and the camera location.
